5. Marking plate information - **DRAFT**

This is the marking plate of another product

[Marking plate description] In order to grant a unique identification code, each manufactured item is labelled with a code composed of xx digits, as follows:

- Product code x characters (Profinet vs TCP/IP)
- Year of production x characters
- Week of production x characters
- Progressive number during the week x characters.

For example, a the fourth ProfiNet reader manufactured during the 26th week of 2019 would have the following code: xxxxxxxxxx

Labels are printed in permanent ink on permanent adhesive and stuck both on the enclosure of the device and the delivery package.
